

MarketNest

User Stories & Feature Specifications

Complete feature backlog with acceptance criteria — v2.0

Updated: June 2026 · Product Requirements

P1 Must have (launch)

P2 Should have (month 2)

P3 Nice to have (month 4+)

NEW Added in v2.0

This document defines every feature of the MarketNest platform as user stories. Each story follows the format: As a [role], I want to [action], so that [benefit]. Stories are grouped by system and feature area. Version 2.0 adds Product Ownership (F-NEW-01) and Seller Anonymity (F-NEW-02) features.

Section 1. Super Admin System

The Super Admin is the single platform owner. Exactly one account bootstrapped via seed script. Full access to all platform data. Only actor who can create seller accounts. Version 2.0: can list products directly and controls seller visibility to buyers.

F-01 — Super Admin Authentication

Secure, session-based login for the super admin. No self-registration — account exists from seed.

SA-01	P1	
As a super admin , I want to log in with my email and password, so that I can access the admin dashboard securely.		
Acceptance Criteria: ✓ Login form accepts email + password ✓ Invalid credentials show a clear error without revealing which field is wrong ✓ Successful login creates a JWT session in an HTTP-only cookie ✓ Session expires after 8 hours of inactivity ✓ Failed login attempts rate-limited to 5 per minute per IP ✓ Logout button invalidates the session immediately		
SA-02	P1	
As a super admin , I want to see a dashboard upon login, so that I get an immediate overview of platform health.		
Acceptance Criteria: ✓ Dashboard shows: total sellers, total buyers, total orders today, GMV today ✓ All metrics load within 1 second ✓ Dashboard refreshes data every 60 seconds automatically		

F-02 — Seller Account Management

Super admin creates, views, suspends, and deletes seller accounts. No seller can self-register.

SA-03	P1	
-------	----	--

As a **super admin**, I want to create a new seller account, so that the seller receives an invitation email to set up their account.

Acceptance Criteria:

- ✓ Form requires: store name, seller email, commission rate
- ✓ System sends invite email with a time-limited link (48 hours)
- ✓ Seller appears in seller list with status=invited
- ✓ If invite link expires, admin can resend it
- ✓ Duplicate email shows a clear validation error

SA-04

P1

As a **super admin**, I want to view a list of all sellers with key metrics, so that I can monitor seller performance at a glance.

Acceptance Criteria:

- ✓ List shows: store name, email, total products, total orders, GMV, status, joined date
- ✓ List is searchable by store name or email
- ✓ List is sortable by each column
- ✓ Pagination: 20 sellers per page

SA-05

P1

As a **super admin**, I want to suspend a seller account, so that their products are hidden and they cannot log in until reactivated.

Acceptance Criteria:

- ✓ Suspend action requires a reason (mandatory text field)
- ✓ Seller's products immediately become invisible to buyers
- ✓ Seller receives email notification of suspension with reason
- ✓ Seller cannot log in while suspended — sees a clear suspended message
- ✓ Admin can reactivate the seller with one click

SA-06

P1

As a **super admin**, I want to permanently delete a seller account, so that their data is removed from the platform.

Acceptance Criteria:

- ✓ Delete action requires typing 'DELETE' to confirm
- ✓ Seller's products are soft-deleted (hidden, not removed from DB)
- ✓ Existing orders referencing the seller's products remain intact for audit
- ✓ Action recorded in audit log with admin ID and timestamp
- ✓ Deleted seller cannot be recovered — admin is warned of this

F-03 — Platform Analytics & Reporting

Real-time and historical view of platform performance.

SA-07	P1	
As a super admin , I want to view platform-wide revenue and order metrics, so that I can make informed business decisions.		
Acceptance Criteria: ✓ Dashboard shows: GMV (today, 7d, 30d, all-time), order count, average order value ✓ Line chart shows daily GMV for past 30 days ✓ Revenue breakdown by category (pie/bar chart) ✓ Revenue breakdown by product type: seller-owned vs platform-owned ✓ Top 10 sellers by GMV ✓ Top 10 products by sales volume		
SA-08	P1	
As a super admin , I want to export analytics data as a CSV, so that I can analyse data in my own tools.		
Acceptance Criteria: ✓ Export button on analytics page ✓ Export runs as background job and emails CSV download link ✓ CSV includes: date, orders, GMV, new users, new sellers, top products, owner_type breakdown ✓ Date range is selectable before export		

F-04 — Category & Catalogue Management

Super admin owns the global category tree.

SA-09	P1	
As a super admin , I want to create, edit, and delete product categories, so that sellers have an accurate and organised taxonomy.		
Acceptance Criteria: ✓ Category has: name, slug (auto-generated), parent category (optional), image, sort order ✓ Nested categories up to 3 levels deep ✓ Deleting a category with active products is blocked — admin must reassign first ✓ Category changes reflected on buyer storefront within 60 seconds (ISR revalidation)		
SA-10	P1	

As a **super admin**, I want to manage homepage banners and featured listings, so that I can run promotions and highlight specific products.

Acceptance Criteria:

- ✓ Banner management: upload image, set link URL, display order, active dates
- ✓ Featured products: select up to 8 products to appear in 'Featured' section
- ✓ Changes go live immediately (no ISR delay for dynamic sections)

F-NEW-01 — Product Ownership Management ★ NEW

Super admin can list products directly under MarketNest Official or on behalf of any seller. This protects commission by keeping all transactions on-platform even when vendors prefer anonymous listing.

SA-11

NEW

As a **super admin**, I want to add a product under 'MarketNest Official', so that we can sell platform-sourced inventory without exposing any vendor identity.

Acceptance Criteria:

- ✓ Product creation form includes an 'Owner' dropdown: MarketNest Official | [seller list]
- ✓ Selecting 'MarketNest Official' sets owner_type=platform_owned and seller_id=NULL
- ✓ Product displays a subtle 'MarketNest Official' badge on the buyer storefront — no other seller info
- ✓ Order items from platform-owned products do not generate seller payout records
- ✓ Platform-owned orders route to admin's fulfilment queue, not a seller dashboard
- ✓ Embedding is generated automatically after publish — identical to seller products

SA-12

NEW

As a **super admin**, I want to add a product on behalf of a seller, so that the seller gets fulfilment credit and payout without having created the listing themselves.

Acceptance Criteria:

- ✓ Owner dropdown shows all active sellers in addition to MarketNest Official
- ✓ Selecting a seller sets owner_type=seller_assigned and seller_id to that seller's ID
- ✓ Product appears in the selected seller's product list with a 'Created by admin' label
- ✓ Seller can edit and fulfil the product — they cannot change the owner_type
- ✓ Payout calculation uses that seller's commission_rate as normal
- ✓ Buyer storefront shows no seller identity regardless of owner_type

SA-13

NEW

As a **super admin**, I want to view all products regardless of owner type, so that I have a complete picture of every listing on the platform.

Acceptance Criteria:

- ✓ Product list in admin portal shows all three owner types with a visible 'Type' badge
- ✓ Filter by owner_type: All | Seller-owned | Platform-owned | Seller-assigned
- ✓ Search by product title, SKU, or seller name (internal view only)
- ✓ Bulk actions: publish, unpublish, reassign owner type, delete

Section 2. Seller System

Sellers are created by the super admin. Each seller manages their own product catalogue, views and processes their orders, and tracks earnings. Sellers cannot see other sellers' data. Seller identity is never exposed to buyers — enforced at API and UI levels.

F-05 — Seller Onboarding

Seller receives email invite and completes account setup.

SE-01	P1	
As a invited seller , I want to click the invite link and set up my account, so that I can start listing products on the platform.		
Acceptance Criteria: ✓ Invite link opens a setup page with seller's email pre-filled ✓ Seller sets: password, full name, phone number, store description, store logo ✓ Store slug is auto-generated from store name (editable) ✓ On completion, seller is redirected to their dashboard ✓ Invite link expires after 48 hours — seller sees a clear expiry message		
SE-02	P1	
As a seller , I want to log in to my seller portal, so that I can access my dashboard and manage my store.		
Acceptance Criteria: ✓ Email + password login ✓ Forgot password flow sends reset email within 30 seconds ✓ Session lasts 8 hours, 'remember me' extends to 30 days ✓ Suspended account shows a clear message, not a generic error		

F-06 — Product Management

Sellers manage their full product catalogue: add, edit, delete, stock.

SE-03	P1	
-------	----	--

As a **seller**, I want to add a new product to my catalogue, so that buyers can discover and purchase it.

Acceptance Criteria:

- ✓ Product form: title, description (rich text), category, price, compare price, SKU, stock
- ✓ Up to 10 images per product, drag-and-drop upload, max 5MB each
- ✓ Images uploaded to Supabase Storage, CDN URL stored
- ✓ Product can be saved as draft or published immediately
- ✓ Published product appears on buyer storefront within 60 seconds
- ✓ Embedding generated automatically in background after publish
- ✓ owner_type is automatically set to seller_owned — seller cannot change this

SE-04

P1

As a **seller**, I want to add variants to a product, so that buyers can choose the correct size, colour, or configuration.

Acceptance Criteria:

- ✓ Variants defined by option names (e.g. Size, Colour) and values (e.g. S, M, L)
- ✓ Each variant can have its own price delta and stock quantity
- ✓ At least one variant can be marked as default
- ✓ Out-of-stock variants are shown to buyers but not purchasable

SE-05

P1

As a **seller**, I want to edit an existing product, so that I can keep product information accurate and up to date.

Acceptance Criteria:

- ✓ All product fields are editable after publish
- ✓ Image reordering via drag-and-drop
- ✓ Changes to price or stock take effect immediately
- ✓ Editing a published product does not take it offline during save
- ✓ For seller-assigned products, seller can edit content but owner_type field is read-only

SE-06

P1

As a **seller**, I want to view and manage my product list, so that I have a clear overview of my entire catalogue.

Acceptance Criteria:

- ✓ List view with search, filter by category, filter by status
- ✓ Shows: title, thumbnail, price, stock, status, sales count, owner_type badge
- ✓ Bulk actions: publish, unpublish, delete selected
- ✓ Low-stock alert: products with stock < 5 highlighted in amber

F-07 — Seller Order Management

Sellers view and process orders containing their products.

SE-07	P1	
As a seller , I want to see a list of all orders containing my products, so that I can process them efficiently.		
Acceptance Criteria: ✓ Order list shows: order ID, items (from my store), my portion total, status, date ✓ Buyer name shown internally for fulfilment purposes only — never shared with buyer ✓ Filterable by status: new, processing, shipped, delivered, cancelled ✓ New orders trigger browser notification and email alert ✓ Orders from other sellers are never visible		
SE-08	P1	
As a seller , I want to update the status of an order, so that the buyer is kept informed of their order progress.		
Acceptance Criteria: ✓ Status transitions: confirmed → processing → shipped → delivered ✓ Marking as 'shipped' requires tracking number and courier name ✓ Each status change sends automated email and SMS to buyer (MarketNest-branded, no seller name) ✓ Real-time status update visible to buyer within 2 seconds via Supabase Realtime ✓ Cancellation allowed only in 'confirmed' status — seller must provide reason		
SE-09	P1	
As a seller , I want to view full order details, so that I have all information needed to fulfil the order.		
Acceptance Criteria: ✓ Shows: buyer's shipping address, phone number, items ordered with variants, quantities, prices ✓ Payment method shown (COD or online) ✓ Order timeline shows each status change with timestamp ✓ Buyer contact info is for fulfilment only — no buyer-to-seller messaging feature		

F-08 — Seller Earnings & Payouts

Sellers track their revenue and upcoming payouts.

SE-10	P1	
As a seller , I want to view my earnings dashboard, so that I can track my revenue and understand my commission deductions.		
Acceptance Criteria: ✓ Shows: gross sales, platform commission, net earnings for this week / month / all-time ✓ Bar chart of daily earnings for past 30 days ✓ Commission rate shown clearly (e.g. 10%) ✓ Platform-owned products not counted in seller earnings		
SE-11	P1	
As a seller , I want to view my payout history, so that I have a clear record of all payments received.		
Acceptance Criteria: ✓ Table: period, gross, commission, net, status (pending/paid), paid date ✓ Downloadable as CSV or PDF ✓ Pending payout shows estimated payment date		

Section 3. Buyer / Storefront System

Buyers interact with the public-facing storefront. Browse and add to cart without account. Account required only at checkout. Both Cash on Delivery and online payment supported. Version 2.0: seller identity is never shown to buyers on any page or in any communication.

F-09 — Product Discovery & Browse

Fast, intuitive product browsing for all users.

BU-01	P1	As a guest user, I want to browse products without creating an account, so that I can explore the platform before committing. Acceptance Criteria: ✓ Homepage loads in under 1 second globally (ISR-cached) ✓ All product pages are accessible without login ✓ No sign-in prompts during browsing ✓ Category navigation visible and functional from homepage ✓ No seller name, store name, or seller contact info appears anywhere on the storefront
BU-02	P1	As a buyer, I want to search for products using keywords, so that I can quickly find what I am looking for. Acceptance Criteria: ✓ Search bar is prominent on every page ✓ Results appear within 300ms ✓ Semantic search returns relevant results even with imprecise keywords ✓ Spelling corrections handled gracefully ✓ Search results show: product image, title, price, rating — NO seller name or store name
BU-03	P1	As a buyer, I want to filter and sort search results, so that I can narrow down results to exactly what I need. Acceptance Criteria: ✓ Filters: category, price range (min/max slider), rating (min stars) ✓ Seller filter is NOT available to buyers — seller identity is hidden ✓ Sort options: relevance, price low-to-high, price high-to-low, newest, best rated ✓ Filters applied instantly without full page reload ✓ Active filters shown as removable chips
BU-04	P1	

As a **buyer**, I want to view a product detail page, so that I have all information needed to make a purchase decision.

Acceptance Criteria:

- ✓ Shows: all product images (gallery), title, price, compare price (% discount badge)
- ✓ Variant selector: size, colour etc. with clear stock status
- ✓ Full product description with rich text formatting
- ✓ No seller name, store link, or seller contact info — ever
- ✓ Platform-owned products show a 'MarketNest Official' badge only
- ✓ Average rating and review count
- ✓ Related products section (AI-powered)

F-10 — Shopping Cart

Guest and authenticated cart with seamless merge on login.

BU-05	P1	
As a guest user , I want to add products to my cart without logging in, so that I can shop and decide to check out later.		
Acceptance Criteria: ✓ Add to cart works immediately — no login prompt ✓ Cart icon in header shows item count in real time ✓ Cart persists for 7 days in Redis using session token ✓ Adding the same product again increases the quantity ✓ If product goes out of stock after adding, cart shows a warning at checkout		
BU-06	P1	
As a buyer , I want to view and manage my cart, so that I can review my selections before purchasing.		
Acceptance Criteria: ✓ Cart page shows: product image, title, variant, unit price, quantity selector, line total, remove button ✓ Quantity can be changed inline — total updates immediately ✓ Stock validation: if requested quantity exceeds stock, quantity is capped with a message ✓ Order summary shows: subtotal, estimated shipping, total ✓ No seller identity shown anywhere in the cart view		
BU-07	P1	
As a buyer , I want to have my guest cart merged with my account after login, so that I do not lose the items I added before signing in.		
Acceptance Criteria: ✓ On login at checkout, guest cart items added to user's existing cart ✓ If same product exists in both carts, quantities are summed (capped at stock) ✓ Guest session token invalidated after merge ✓ Merge is invisible to the user — they see a unified cart		

F-11 — Checkout & Payment

Streamlined checkout supporting COD and online payment.

BU-08	P1	
-------	----	--

As a **guest user**, I want to be prompted to log in only at checkout, so that I can browse freely but still complete a purchase securely.

Acceptance Criteria:

- ✓ Checkout page is the first and only point where login is required
- ✓ Clear messaging: 'Sign in to complete your order'
- ✓ Google OAuth one-click sign-in available
- ✓ After sign-in, buyer returned directly to checkout — not homepage
- ✓ Guest cart merged automatically on login

BU-09

P1

As a **buyer**, I want to enter my shipping address at checkout, so that my order is delivered to the correct location.

Acceptance Criteria:

- ✓ Address form: full name, phone, address line 1, address line 2, city, state, postal code, country
- ✓ Saved addresses for returning buyers — select from list or add new
- ✓ Phone number is mandatory (needed for delivery coordination)
- ✓ Address validated for completeness before order is placed
- ✓ Seller contact info is never shown on the address step

BU-10

P1

As a **buyer**, I want to choose between Cash on Delivery and online payment, so that I can pay in the way most convenient for me.

Acceptance Criteria:

- ✓ Payment method selector clearly shows both options
- ✓ COD option shows estimated delivery time
- ✓ Online payment opens Stripe Elements (card number, expiry, CVC)
- ✓ Apple Pay and Google Pay shown if supported by the device
- ✓ Selected payment method displayed on order summary

BU-11

P1

As a **buyer**, I want to complete an online payment securely, so that my order is confirmed and I receive a receipt.

Acceptance Criteria:

- ✓ Stripe Elements embedded in page — no redirect for card payment
- ✓ Payment processing shows loading state — button disabled to prevent double-submit
- ✓ Successful payment immediately redirects to order confirmation page
- ✓ Order confirmation email sent within 30 seconds (MarketNest-branded, no seller identity)
- ✓ Failed payment shows a specific error message with retry option

BU-12

P1

As a **buyer**, I want to place a Cash on Delivery order, so that my order is registered and the seller is notified.

Acceptance Criteria:

- ✓ COD order created immediately on form submission
- ✓ Order confirmation page confirms: order ID, items, total, delivery estimate
- ✓ Seller/admin receives email notification of new COD order (internal only)
- ✓ Buyer receives order confirmation email (MarketNest-branded)
- ✓ Order status starts as pending_cod

F-12 — Order History & Tracking

Buyers track all past and current orders in real time.

BU-13	P1	
As a buyer , I want to view my order history, so that I can track all my past and current orders.		
Acceptance Criteria: ✓ Order list shows: order ID, date, items summary, total, status badge ✓ Filterable by status ✓ Clicking an order opens the detail view		
BU-14	P1	
As a buyer , I want to track my order status in real time, so that I always know where my order is.		
Acceptance Criteria: ✓ Order detail shows visual timeline: confirmed → processing → shipped → delivered ✓ Tracking number and courier name shown once order is shipped ✓ Status updates push via Supabase Realtime — page updates without refresh ✓ Email and SMS notification at each status change ✓ All communications are MarketNest-branded — no seller name or contact shown		
BU-15	P1	
As a buyer , I want to cancel an order that has not yet been processed, so that I am not charged for an order I no longer want.		
Acceptance Criteria: ✓ Cancel button visible while order is in 'confirmed' status ✓ Cancellation confirmation prompt before final action ✓ Online payment: refund initiated via Stripe within 5 minutes ✓ Refund timeline communicated clearly (3-5 business days typical) ✓ COD order: cancelled without any charge		

F-13 — Buyer Account & Profile

Buyers manage personal information, addresses, and account security.

BU-16	P1	
-------	----	--

As a **buyer**, I want to create an account using Google, so that I can sign up with one click without remembering a new password.

Acceptance Criteria:

- ✓ 'Continue with Google' button on sign-in and checkout pages
- ✓ First Google sign-in creates a profile with role=buyer automatically
- ✓ Subsequent sign-ins with same Google account always route to the same profile
- ✓ If an email account already exists with same email, accounts are merged

BU-17

P1

As a **buyer**, I want to update my profile information, so that my account details stay current.

Acceptance Criteria:

- ✓ Editable fields: full name, phone number, avatar (upload)
- ✓ Email is non-editable (tied to auth provider)
- ✓ Password change available for email/password accounts
- ✓ Changes saved with confirmation toast

BU-18

P1

As a **buyer**, I want to manage multiple saved addresses, so that I do not have to re-enter my address for every order.

Acceptance Criteria:

- ✓ Add, edit, delete saved addresses
- ✓ Set a default address
- ✓ Maximum 5 saved addresses per account
- ✓ Default address pre-selected at checkout

F-14 — Product Reviews & Ratings

Buyers leave reviews on products they have purchased.

BU-19

P1

As a **buyer**, I want to leave a rating and review for a product I purchased, so that other shoppers benefit from my experience.

Acceptance Criteria:

- ✓ Review prompt appears after order is marked as delivered
- ✓ Star rating 1-5 is mandatory
- ✓ Written review optional (max 500 characters)
- ✓ Only verified purchasers can leave reviews
- ✓ One review per buyer per product
- ✓ Review appears on product page within 60 seconds
- ✓ Review is linked to product only — no seller name shown

BU-20

P1

As a **buyer**, I want to read reviews from other buyers, so that I can make an informed purchase decision.

Acceptance Criteria:

- ✓ Reviews shown on product detail page below the description
- ✓ Average star rating shown prominently near the price
- ✓ Reviews sorted by most recent by default
- ✓ Rating distribution bar chart (5-star to 1-star breakdown)

Section 4. Cross-Cutting & Platform Features

F-15 — Notification System

Multi-channel notifications across email, SMS, and real-time for all actors. All buyer-facing notifications are MarketNest-branded with no seller identity.

PL-01	P1	
As a buyer , I want to receive an email confirmation for every order, so that I have a record of my purchase.		
Acceptance Criteria: ✓ Email sent within 30 seconds of order creation ✓ Email includes: order ID, itemised list, totals, estimated delivery, tracking link (once shipped) ✓ HTML email with MarketNest branding — no seller name or contact info ✓ Plain text fallback included		
PL-02	P1	
As a seller , I want to be notified immediately when a new order comes in, so that I can start processing without delay.		
Acceptance Criteria: ✓ Email notification within 30 seconds of new order ✓ Browser push notification if seller is in the seller portal ✓ Notification includes: order ID, items, buyer shipping city, payment method ✓ Buyer personal contact info shown for fulfilment purposes only		
PL-03	P1	
As a buyer , I want to receive an SMS when my order ships, so that I know my order is on its way even if I am not checking email.		
Acceptance Criteria: ✓ SMS sent when order is marked as 'shipped' ✓ SMS includes: tracking number and a short tracking URL ✓ SMS uses the phone number on the order's shipping address ✓ SMS sender shows MarketNest brand name — no seller identity		

F-NEW-02 — Seller Anonymity Enforcement ★ NEW

Buyers never see seller identity, store names, or contact information on any buyer-facing page, email, SMS, or API response. This is enforced at multiple layers.

PL-04-NEW	NEW	
-----------	-----	--

As a **buyer**, I want to never see seller or vendor information while shopping, so that the platform maintains a consistent brand experience and protects me from off-platform solicitation.

Acceptance Criteria:

- ✓ No seller name, store name, store link, or contact info rendered on any buyer page
- ✓ Product detail page shows only product info + optional 'MarketNest Official' badge
- ✓ Cart and checkout pages show product names only
- ✓ Order confirmation and tracking pages show MarketNest branding only
- ✓ All buyer emails and SMS messages are MarketNest-branded with no seller identity
- ✓ API responses to buyer/guest roles are serialised via BuyerProductDTO — seller fields stripped
- ✓ RLS column-level security prevents direct DB access to seller fields from buyer role

PL-05-NE
W

NEW

As a **super admin**, I want to verify that seller identity is hidden from buyers, so that I can confirm the anonymity enforcement is working correctly.

Acceptance Criteria:

- ✓ Admin portal shows a 'Buyer view preview' toggle on any product page
- ✓ Preview shows exactly what a buyer sees — no seller info visible
- ✓ Audit log records any seller field being returned to a buyer role (should be zero)
- ✓ Penetration test checklist includes seller data exposure as a test case

F-16 — AI-Powered Search & Recommendations

Semantic product search and personalised recommendations powered by pgvector and RAG.

PL-06

P1

As a **buyer**, I want to find products using natural language, so that I get accurate results even when I do not know the exact product name.

Acceptance Criteria:

- ✓ Search uses vector similarity on product embeddings
- ✓ Results are relevant even with synonyms or descriptive queries
- ✓ Keyword search remains as fallback if vector search returns < 3 results
- ✓ Search latency < 300ms at the 95th percentile
- ✓ All three product owner types are indexed and searchable

PL-07

P2

As a **buyer**, I want to see personalised product recommendations, so that I discover products I am likely to enjoy without searching.

Acceptance Criteria:

- ✓ 'Recommended for you' section on homepage (logged-in users)
- ✓ Recommendations based on purchase history and browsing events
- ✓ Updated daily via background job
- ✓ New users see 'Trending' products until personalisation is available

PL-08

P3

As a **buyer**, I want to use an AI chat assistant to find products, so that I can describe what I want in plain language and get curated suggestions.

Acceptance Criteria:

- ✓ Chat widget available on the buyer storefront
- ✓ Natural language product discovery (e.g. 'gift for my mum who likes cooking under \$50')
- ✓ AI retrieves top matching products via RAG and presents them as clickable cards
- ✓ No seller identity in AI responses or retrieved product context
- ✓ Conversation history maintained within the session

F-17 — Performance & Reliability

Non-functional requirements as user-facing acceptance criteria.

PL-09

P1

As a **buyer**, I want to have the storefront load quickly on any device, so that shopping is a pleasant experience regardless of connection speed.

Acceptance Criteria:

- ✓ Homepage Largest Contentful Paint (LCP) < 1.5s on 4G
- ✓ Lighthouse Performance score > 90 on desktop and mobile
- ✓ Product images served in WebP format with correct device sizing
- ✓ First meaningful content visible within 0.8s

PL-10

P1

As a **buyer**, I want to have the platform remain available during high traffic, so that I can shop during sales events without the site going down.

Acceptance Criteria:

- ✓ System handles 1,000 concurrent checkouts without degradation
- ✓ API p95 response time < 200ms under normal load
- ✓ API p95 response time < 500ms under 10x peak load
- ✓ CDN absorbs product page traffic — origin sees < 10% of total requests

End of Document — MarketNest User Stories v2.0 · Total stories: 42 (38 original + 4 new in v2.0)
